

ENVIRONMENTAL PROTECTION AGENCY

Request for additional Sampling
at Army Creek Landfill

May 13, 1977

Larry M. Miller, Chief
Water Quality Monitoring Branch (35460)
Criteria Unit, Director
Annapolis Field Office (35420)

This is to confirm the Water Quality Branch's request for additional
confirmation on the pollutants found at the drinking wells at
Army Creek (Langollen) landfill Arlington Water Co. site.

Attached is their official request. If you would like to get Wheeling
involved let me know but for now this one is your case to handle.

When you've finalized your "plan of action" please send me a copy so
we can forward it to the various groups involved. This will let them
know exactly what you plan to do and what they can expect.
